Notes:

This list includes camera models, which can be used with the Swarovski Optik digital camera adapter DCA. Swarovski Optik doesn't assume liability or responsibility for pictures taken with the above mentioned camera models. List is subject to alterations.

In case you use a camera not listed yet, please inform us about manufacturer, brand and type.
(info@swarovskioptik.at, subject: Digiscoping)

In case you plan to purchase a digital camera for use with a telescope ("digiscoping"), which is not list yet, please test the camera with the scope and the adapter first! The camera needs to be connected to the DCA and must be able to prevent "vignetting" (black shadows at the edge of the image) by using the optical zoom (not the digital zoom!) of the camera.
